EDUCATION

Computer Science and Engineering 2021 – 2025
Government Engineering College, Talakal-583238 *CGPA: 7.95*

Pre-University Course 2019 – 2021
Annadaneshwar PU College, Naregal -582119

TECHNICAL SKILLS

Language: Java
Databases: MySQL
Web Technologies: HTML, CSS, JavaScript, React
Tools & Software: Eclipse, VS Code
Version control: Git, GitHub

INTERNSHIP

Pentagon Space - Java Full Stack Development Jul 2025-Jan2026

- Completed Java Full Stack Development training covering Core Java and advanced Java concepts.
- Gained hands-on experience in frontend technologies including HTML, CSS, JavaScript, and basic React.
- Learned backend development using Java, JDBC, Servlets, and basics of Spring.
- Worked with MySQL for database design and CRUD operations.
- Practiced version control using Git and GitHub.
- Built mini projects to understand full stack application flow. Completed an online internship focused on Web Technology fundamentals.

Intern – Parvam Consul Tech Pvt. Ltd Oct 2023-Nov 2023

Entrepreneurship and Innovation

- Gained exposure to entrepreneurship and innovation concepts through structured training and activities. Researched and analyzed a business idea titled "Establishment of Nursery." Conducted market research, basic financial analysis, and feasibility study for the business idea
- Prepared and delivered presentations explaining the business model and implementation plan.

Internshala - Web Development Aug 2024-Oct 2024

- Completed an online internship focused on Web Technology fundamentals. Learned and applied HTML, CSS, and JavaScript to build responsive web pages.
- Developed basic frontend components with proper structure and styling. Implemented responsive web design using Flexbox and media queries.
- Gained hands-on experience through assignments and mini projects.

PROJECTS

Food Delivery Web Application (Java Full Stack) Jul 2025-Jan 2026

- Developed a Java Full Stack food delivery web application using JSP, Servlets, and JDBC.
- Designed responsive frontend pages using HTML, CSS, and JavaScript.
- Implemented backend logic with Servlets to handle user requests and application flow. Used JDBC to connect the application with MySQL for CRUD operations.
- Created dynamic web pages using JSP for displaying menus, orders, and user details.
- Implemented core features such as user registration, login, menu browsing, cart, and order placement. Used **Git** for version control and project management.

Helmet Compliance Detection System — Mar 2025-Apr 2025

- Developed a real-time helmet compliance detection system using deep learning techniques. Implemented YOLOv5 for object detection to identify riders with and without helmets.
- Used CNN models for accurate image classification, Built the backend using Flask to handle model inference and API requests.
- Utilized PyTorch for training and deploying deep learning models. Applied the system to enhance road safety through automated monitoring.

Smart Task Management Web App — Aug 2024-Oct 2024

- Developed a task management web app using React, JavaScript, HTML, and CSS. Implemented features for creating, updating, deleting, and tracking task status.
- Designed a responsive and user-friendly interface for mobile and desktop devices.
